

Media-rich case studies focused on content analysis, problem solving and decision making

Challenge Series

Key Features

Interactive, first person role playing situation targeted at a very specific situation

In 15-20 minutes, users will walk through a complete scenario and by interacting with the situation and the other characters in the simulation practice and improve their skills

The Challenge Series is designed to be engaging, and fun with hidden surprises that a user can click on scattered throughout

On average 15-20 minutes

Realistic and highly engaging learning

Today's learners expect e-learning to be as engaging and visually rich as many of the web-based environments they encounter on a daily basis. SkillSoft's latest content innovation, the Challenge Series was designed with those expectations in mind.

Learners often need the ability to immerse themselves in a scenario or a subject to gain the full value of the learning experience. However immersion is not always possible with traditional learning assets. SkillSoft has introduced the Challenge Series to provide learners with scenario-based learning that enables them to experience real world situations in safe, exploratory environments.

Interactivity and generational appeal

The design of the Challenge Series helps to reinforce and practice the application of learned concepts on the job. Within the Challenge Series, a learner needs to make choices based on background information and the discovery process. Each Challenge provides a short summarization of the key learning points, along with the opportunity to revisit the solutions, make a different selection, or to print a text version of the summary. The result is a highly engaging learning resource that appeals to multiple generations and that can be used in support of multiple workplace performance learning models and environments.

Apply new concepts on the job

Each Challenge includes a one page printable text summary outlining key take-aways that can impact learning in the workplace. Challenge Series are available in a wide range of business and professional topics such as Leadership, Management,

Call Center, Human Resources, and Six Sigma to name a few. Challenges are a practical solution that briefly immerse learners in a business situation, and get them back to the job with tools to apply the concepts in their place of work.

Another innovative product from SkillSoft

SkillSoft continually strives not only to expand the subjects and breadth of content but continually evaluate the need for innovative, richer but yet practical learning assets. For more information on the Challenge Series contact your SkillSoft account team.

Rich scenario-based learning in real world business situations.

Leader as Motivator

Helton Stores Company

Leader as Motivator

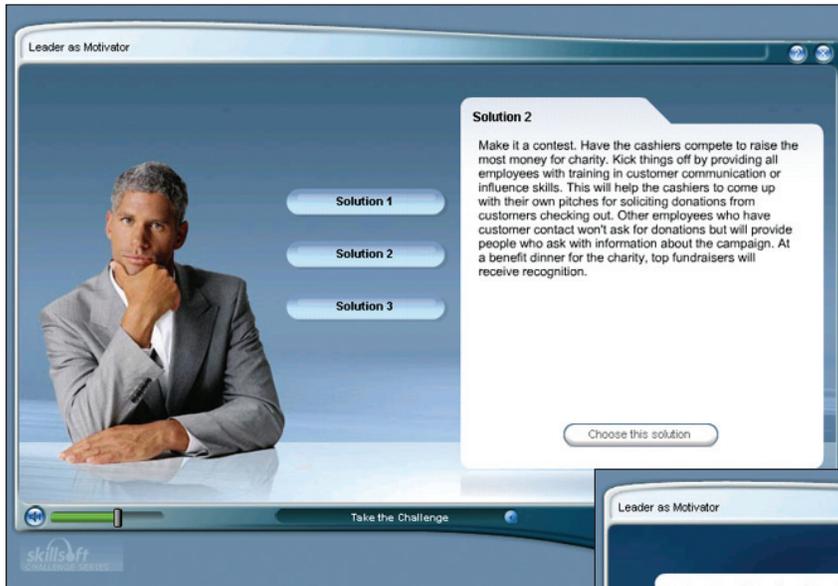

Leader as Motivator

Implementing this approach could be tricky. What do you see as the key to making it work?

- The key will be letting the cashiers know this is their chance to shine. That should really motivate them. Especially if they know the company has an event planned for recognizing the top fundraisers.
- Getting the cashiers truly excited and enthusiastic about the campaign will be the key. Management can make that happen by offering great prizes for top fundraisers.
- The training kicking off the campaign will be the key. Ideally, the cashiers will learn new skills that will help them raise money for the campaign. This opportunity for personal growth will motivate them to succeed.

Take the Challenge

Rich and Engaging

Printable takeaways help apply learning on the job.
