PMI
Project Management Institute

About Project Management Institute (PMI®)

Founded in 1969, the Project Management Institute (PMI®) is the world's leading not-for-profit project management professional association, with over 330,000 members throughout the world. PMI® provides global leadership in the development of professional standards, certifications, research, publications, education and training in the fields of project management and program management.

Skillsoft is a PMI® Registered Education Provider

Skillsoft is a PMI® Charter Global Registered Education Provider, #1008. Through this designation, Skillsoft has been recognized as a provider of project management elearning and virtual instructor-led courses that can assist PMI® members, and other project management stakeholders in their ongoing professional development.

Skillsoft offers courseware that will prepare individuals for three of PMI®'s globally recognized certifications for project management, the Project Management Professional (PMP®), the Certified Associate of Project Management (CAPM®) and the Agile Certified Practitioner (PMI-ACP®).

PMP® Credential

The Project Management Professional (PMP®) is one of the world's most widely recognized professional credentials. This certification objectively assesses and measures experience, education and professional knowledge—the foundation of practice as a project manager. Achievement of the PMP credential serves as the basis from which professionals can competently practice as a project manager, leading and directing project tasks. By obtaining this credential, you demonstrate a commitment to the project management profession.

PMI® Knowledge Areas Aligned with *PMBOK® Guide* - Fourth Edition	
Project Management Essentials	3 Courses
Project Integration Management	3 Courses
Project Scope Management	3 Courses
Project Time Management	3 Courses
Project Cost Management	2 Courses

Project Procurement Planning	2 Courses
PMI® Standard-Aligned Knowledge Areas	
Code of Ethics and Professional Conduct	2 Courses

Note: The Code of Ethics and Professional Conduct is not part of the PMBOK® Guide Fourth Edition. However this series covers important topics which are part of the PMP and CAPM Exams.

CAPM® Credential

The Certified Associate in Project Management (CAPM®) credential is designed for professionals who provide specialized skills to a project team, for aspiring project managers and for graduate and undergraduate students who are studying project management. The credential can benefit a wide range of team members and specialists who want to demonstrate a comprehensive understanding of project management good practices. By gaining knowledge of project management processes and terminology, professionals from all disciplines can reach higher levels of performance in their work.

Specific education and experience requirements, agreement to adhere to a code of professional conduct and the passing of a multiple-choice question exam are required to be eligible. The Project Management Body of Knowledge (*PMBOK® Guide*) is PMI®'s standards document outlining generally accepted knowledge and practices of project management. PMI® has shared intentions to update its standards every five years.

PMI-ACP® Credential

The Agile Certified Practitioner (PMI-ACP)® is new from PMI and is designed for practitioners who utilize Agile approaches to project management in their projects. The credential can benefit a wide range of individuals who have experience working on agile projects; as it is not limited to project managers or PMP® credential holders. Obtaining this credential demonstrates a level of professionalism in agile practices of project management, and increases professional versatility in both Waterfall and agile techniques.

PMI's PMBOK® Guide – Fourth Edition

Skillsoft has worked closely with the Project Management Institute (PMI®) to develop a high-quality courseware curriculum that provides complete coverage of the *PMBOK® Guide* – Fourth Edition standards. The Fourth Edition of the PMBOK® standards reflects the continuing evolution of project management knowledge and practices. Skillsoft has developed 10 series of courses as well as mentoring and TestPrep Exams that provide project managers with up-to-date and thorough instruction on the latest standards.

In addition to supporting PMP®, CAPM®, and PMI-ACP® with elearning solutions, Skillsoft also supports the PMP certification with Skillsoft Live Learning; our virtual instructor-led offerings. Live Learning offers several courses that qualify for PDUs and contact hours. A recent poll of Skillsoft Live Learning students indicated that of those who took certification exams (across several disciplines, including project management) after their Live Learning exam-prep course, 92% passed their exams!

Earning and Maintaining Certification

Whether working toward certification for the first time or seeking to maintain credentials, Skillsoft courses can help project managers meet certification requirements. Each of Skillsoft's *PMBOK® Guide* – Fourth Edition aligned courses is available for contact hour credit, which is a prerequisite to sit for the certification exams. Additionally, to maintain certification, PMPs® must earn 60 Professional Development Units (PDUs) every three years; PMI-ACPs® must earn 30 PDUs every three years. Skillsoft offers hundreds of courses that are pre-approved for PDU credits under Skillsoft's R.E.P. program.
