

Skillsoft® PRINCE2® Offerings

An international standard for process-based project management

PRINCE2® (Projects in Controlled Environments) is recognized as an international standard for process-based project management. Skillsoft is an authorized training organization, approved by APMG- International.

Skillsoft PRINCE2 resources

Skillsoft courseware maps to foundational and practitioner certifications with learning paths covering the major content of all roles, including the themes, principles, techniques, processes and activities within each process. These learning paths also describe the relationships between processes, along with the associated deliverables, roles, the dimensions of the project and the approach to tailoring PRINCE2 to the project environment.

PRINCE2 Foundation certification

The PRINCE2 Foundation exam aims to measure a candidate's ability to perform as an informed member of a project management team within the PRINCE2 methodology and environment.

Simple PRINCE2 Projects

Of the seven PRINCE2 themes, the one most affected by simple projects is the Organization theme. During the project management team is primarily about roles and function consolidation; roles can be combined but should not be eliminated. As the Executive and Senior User roles are both from the customer environment, these roles can often be combined.

Because the Project Manager is likely to be much closer to the Project Board than on larger more complex projects, members of the Project Board are often in a better position to carry out their own Project Assignments rather than appointing another individual to fill the role.

With small teams it may not be necessary to appoint Team Managers. The Project Manager can take care of these responsibilities. The Project Manager may undertake the role of Project Support and be a team member. The Project Manager should take care to balance the effort of managing the project with the effort of doing any project work.

Introduction to Tailoring PRINCE2

PRINCE2 defines tailoring as the appropriate use of PRINCE2 on any given project, ensuring that there is correct amount of planning, control, governance and use of processes and themes. To put it simply, tailoring is done by the project management team to adjust the method to the context of a specific project.

Skillsoft courseware covers the major content of all roles.

Candidates need to be able to understand the terminology and the principles of PRINCE2, including the ability to:

- Describe the major content of all roles, including the themes, principles, techniques, processes and the activities within each process.
- Identify the management products' relationships with the seven PRINCE2 processes.
- Identify the main purpose and the content of the major management products.
- Describe and understand the relationships between the processes, along with the associated deliverables, roles and the dimensions of the project.
- Describe the approach to tailoring PRINCE2 to the project environment.

The PRINCE2 Foundation certification is targeted at:

- New and experienced project staff.
- People who may go on to practitioner training.
- Consultants/contract staff operating in a PRINCE2 environment.
- Project Managers considering a career in a PRINCE2 environment.

PRINCE2 Practitioner certification

The PRINCE2 Practitioner exam prepares candidates to manage a project within an environment supporting PRINCE2. The highest level of PRINCE2 qualification, candidates will have a comprehensive knowledge of the relationship between the PRINCE2 principles, themes and processes including:

- A demonstrated understanding of the relationships between principles, themes and processes and PRINCE2 products and can apply this understanding.
- A demonstrated understanding of the reasons behind the principles, themes and processes of PRINCE2, and the principles underpinning these elements.
- A demonstrated ability to tune PRINCE2 to different project circumstances.

The PRINCE2 Practitioner certification is targeted at:

- Project Managers
- General Managers
- Program Managers
- Team Managers and support staff
- Staff who will have a defined role
- Project Management Consultants
